

Information on New Generation LifeSpace

We deliver our essential skills-for-life education within schools in an innovative pop-up tent which are known as **LifeSpace**, which can be set up in school halls. The **LifeSpace** was developed, giving more space and ventilation for the children who refer to this as Harold's House, after our much-loved mascot, Harold the Giraffe. **LifeSpace** has proved a big hit with both children and teachers,

The new-generation **LifeSpace** is made of much lighter, parachute fabric, which can be split into two separate halves (creating more space for older children) or one half can be set up 'theatre style' for smaller spaces. It is much quieter, lighter and easier for the Educator to transport and erect, and much more comfortable for children.

The new generation LifeSpace costs around £7,500 and includes the following items:-

- Inflatable classroom (3.8 x 3.8m)
- LED lighting system
- Repair kit
- 2 x heavy-duty travel cases
- Branding on windows
- Airfreight & delivery
- Ultra Short Throw projector and screen (£1,100)
